Art Unit: 1756

1. The following is an examiner's statement of reasons for allowance: Copending applications, some of which have matured into patents are made of record and do not anticipate the claimed methods. Difference between the claims of these co-pending applications and the instant claims include the serial processing of one sample at a time in each treatment chamber, the connection of the sample chambers making up the treatment apparatus to each other and the reduced pressure chamber described as facilitating the transfer of a sample between the first and second locations between the first and second locations (plasma chambers). In particular the prior art does not reasonably lead one skilled in the art to connecting the chambers, which do not use vacuum conditions (steps iii and iv) to those which do (i and ii).

The language concerning "one sample" appearing in claims 8, 27 and 69-72 reasonably flows from the discussion of serial processing line shown in figure 3, in particular one or a plurality of samples being on a sample table in each of the processing chambers [0048 in prepub]..

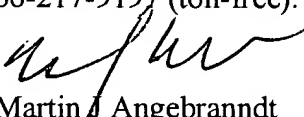

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Martin J. Angebrannt whose telephone number is 571-272-1378. The examiner can normally be reached on Monday-Thursday and alternate Fridays.
